

Welded reducer

INDRC

Description

Welder reducer for round duct.
Can be manufactured concentric or according to customer's design.

The reducers can be produced with welding collars or with flanges (picture above).

Standard flanges are according to Eurovent standard, other hole pitches on request.

Standard materials S235 with epoxy paint, EN1.4301 or EN1.4404, other materials on request.

Material thickness can be up to 6 mm and flanges 8 mm.

Connection

0 = Welding collar

1 = Eurovent flange

5 = Bespoke flange

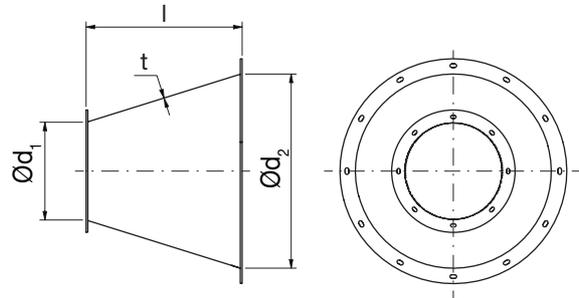

Please specify when ordering.

Produced in Jyväskylä Finland.
