4. RAW MATERIALS

Galvanized steel

Raw materials

Steel

96.9<x<97.7

EN 10346

Component Material Transport type

Steel Ship

Country of raw material extraction City of raw material extraction

Sweden

Country of manufacture/production City of manufacture/production

Comment

The steel raw material is produced at different smelting plants, mainly in the EU, according to the detailed specification of the current standard. The sheet dimensions are then adjusted at the production unit in Grevie.

Total recycled material in the article

Is recycled material included in the article?

Material

Steel

Proportion after the consumer stage Proportion before the consumer stage Weight/percent by weight

100 0 20 %

Comment

About 20% recycled material are being used in the production of steel.

Renewable material

Enter proportion of renewable material in the article (short cycle, less than 10 years):	Enter proportion of renewable material in the article (long cycle, more than 10 years):
0	0
Included biobased raw material is tested according to ASTM test met	thod D6866:
Is there supporting documentation for the raw materials for third-party certific recycling processes or similar (for example BES 6001:2008, EMS certificates)	
No	
Wood raw materials	
Wood raw materials are included	Included wood raw material is certified
How large a proportion is certified [%]?	
What certification system has been used (for example FSC, CSA, SFI with 0	CoC, PEFC)?
Reference number:	
Enter logging country for the wood raw material and that following criteria ha	ave been met. Country of logging:
Does not contain type of wood or origin in CITES appendix of endang	gered species
The timber has been logged legally and there is certification for this	

5. ENVIRONMENTAL IMPACT

Environmental impact during life cycle of the article, production phase module A1-A3 under EN

	(- EN 45004 100 44005 (11 12 - 10
Has environmental product declaration been drawn up according	to EN 15804 of ISO 14025 for the article?
These product-specific rules, known as PCR, have been applied:	Registration number / ID number for EPD:
Climate impact (GWP100) [kg CO2-eq]:	Ozone depletion (ODP) [kg CFC 11-eq]:
Acidification (AP) [kg SO2-eq]:	Ground-level ozone (POCP) [kg ethene-eq]:
Eutrophication (EP) [kg (PO4)-3-eq]:	Renewable energy [MJ]:
Non-renewable energy [MJ]:	If calculation has been made in Green Guide, enter which rating:
If there is environmental product declaration or other life cycle assessments from a life cycle perspective:	ent, describe how the environmental impact of the article is taken into account
The information refer to "gate to gate", inflows (raw materials, inputs, en- (emissions and waste) from it and relates to unit of product 1 kg.	ergy, etc.) for the registered product into the manufacturing unit, and outflows
Country of final manufacture: Sweden Energy used in the manufacture of the product: electricity 0,4 kWh per p renewable sources. See attached file.	roduced kilo. From 2017, all units in Sweden only uses electricity from
Transport: <99% truck, deliveries to the customer/branch, <1% electric f Climate impact from internal tranports: CO2 0,0025 kg, CH4 <0,0001 kg	
Emissions to air, water or soil from the manufacture of the product, clima product (includes energy/waste/scrap/travels) The production itself causes no emissions to air, water or land.	ate impact from operations: carbon dioxide equivalents (CO2-e) ≈ 2,2 kg per kilo
Residual products from the manufacture of the product: <0,5% steel scracarrier with the necessary permits. No waste is exported.	ap, 100% is recycled, waste code 17 04 05. All waste is taken care of by a
For information about raw materials, distribution, waste etc., see the other	er sections.

6. DISTRIBUTION

Distribution of finished article

Does the supplier use Retursystem Byggpall?

Yes

No

Does the supplier apply any system with multiple-use packaging for the article?

No

Ves

Is the supplier affiliated to a system for product responsibility for packaging?

Yes

If yes, which packaging and which system?

Förpacknings & Tidningsinsamlingen

Other information:

If possible products are packed together. The packaging materials include wood, cardboard, and plastic wrap. Wooden pallets are being reused. All packaging consists of recyclable material, the cardboard Lindab uses for packaging consist of 97,5% recycled material. Shipments of manufactured goods are mainly transported by truck to the customer/branch. The average transporting distance is <500 km.

7. CONSTRUCTION PHASE

Construction phase

8.

Does the article make special requirements in storage?	
Yes	
Specify	
To prevent soiling and oxidation, the product should be stored protected from the weather. See Lindab's product catalogue for more information.	
Does the article make special requirements for surrounding building products?	
No	
Specify	
Other information:	
USE PHASE	
Use phase	
Does the article make requirements for input materials for operation and maintenance?	
No	
Specify:	
Does the article require supply of energy during operation?	
No	
Specify:	
Estimated technical service life for the article:	
>50 years	
Comment:	
Lifetime depends on the environment where the product is being used. Corrosive environments can affect the life of the product negatively. There is a special instruction for the care of this product, see Lindab's product catalogue for more information.	
Is there energy labelling under the Energy Labelling Directive (2010/30/EU) for the article? If yes, enter labelling (G to A, A+, A++, A+++):	
Not applicable	
Other information:	

9. DEMOLITION

Demolition

Is th	he article prepared for disassembly (dismantling)?
Not	t applicable
Spe	ecify:
Doe env	es the article require special measures for protection of health and rironment in demolition/disassembly?
No	
Spe	ecify:
Oth	ner information:
The	e product only consists of steel and do not need to be disassembled for recycling. The steel is easily separated during demolition.
). V	WASTE MANAGEMENT
De	elivered article
ls th	he supplied article covered by the Ordinance (2014:1075) on producer responsibility for electrical and electronic products when it becomes waste
No	
ls re	euse possible for the whole or parts of the article when it becomes waste?
Yes	
Spe	ecify:
The	e entire product can be reused.
ls m	naterial recovery possible for the whole or parts of the article when it becomes waste?
Yes	
Spe	ecify:
~99	9% of the material can be recycled.
Is e	energy recovery possible for the whole or parts of the article when it becomes waste?
Yes	s ·
Spe	ecify:
Hea	at recovery occurs at smelter.
Doe	es the supplier have restrictions and recommendation for re-use, material or energy recovery or landfilling?
Yes	
Spe	ecify:
Sho	ould be recycled according to recommended waste code.
