## Insulation cup IK

If the insulation is thicker than 50 mm, there is a risk that the insulation will cover the knob cup and make it difficult to find or use. The insulation cup allows about 100 mm of insulation to be used at the same time as it gives good access to the damper knob. It is quick and easy to fit - just snap it over the edge of the cup. It fits all Lindab dampers with cup, both circular and rectangular.

## Handle DRHTG

Strong handle to facilitate setting. Suits all manual dampers.

## Handle HANDLE

Handle suitable for damper with motor shelves DTHU, DTH1U and DTH2U – without motor. Can be used for temporary setting/locking of the damper blade before the motor is mounted or as a permanent alternative to the motor.

Can be set stepless 0–90°. Fits axle 8×8 mm.

Is advisably fixed with one or two sheet metal screws/rivets.
