

# Connection box

# ARCB

## Description

ARCB is a connection box for the Analog Room Control System ARCS.

The box is powered with 230VAC and can feed 24VAC to one or more UltraLinks. ARCB also have connection terminals for output of two analog flow control signals, one for supply and one for extract.

Additionally there is a possibility to connect a mode switch to set the flow signals to max, min or normal and finally also a connection for a potential free kitchen hood switch that allows the box to balance supply and extract air also accounting for the air extracted by the kitchen hood.

## Dimensions

a <sup>1</sup> [mm]	a <sup>2</sup> [mm]	b <sup>1</sup> [mm]	b <sup>2</sup> [mm]	H [mm]	m [kg]
250	220	200	170	110	1,2

## Technical data

Supply voltage	AC	230	V
Analog interface		0-10 (two channels)	V
Operating temperature		-25... +70	°C
Storage temperature		-30... +70	°C
Humidity		25...85 (non-condensing)	VA
Connectors		Weidmuller ZDU 2.5 Weidmuller ZDK 2.5 Weidmuller ZPE 2.5	
Dimensions	Hight (b <sup>1</sup> )	200	mm
	Width (a <sup>1</sup> )	250	mm
	Deep (H)	110	mm
Degree of protection	EN 60529	IP65
