

# Flexible duct insulation

# SIP

## Dimensions

Dim nom	Length [mm]	Insulation [mm]
100	3000	50
125	3000	50
160	3000	50
200	3000	50
100	4000	25
125	4000	25
160	4000	25

## Description

SIP is intended for insulating circular ventilation ducts that require condensation protection and/or thermal insulation.

The sleeve is produced from glass wool with thickness 25 or 50 mm and has an external jacket made of age-resistant polyethylene plastic. The jacket is also diffusion tight.

An internal transparent plastic sleeve allows for easy installation.

## Max temperature

+80°C
