Article description:

Lindab Facade Cassettes are an elegant and durable wall covering system. It can be used to cover the whole facade, or just parts of it. The products are available in other materials, BPD is received upon request. Assessment at Byggvarubedömningen etc. is registered under the name "Fasadkassetter, lackerat". It is also possible to use the article name as search criteria.

Declarations of performance:
Not applicable

Declaration of performance number:
B-2481

Other information:

Lindab Sverige AB

Company name: Lindab Sverige AB
Organisation number: 556247-2273

The data provider is solely responsible for data on articles/products that have been registered in the database. The data provider and the Swedish Association of Construction Product Industries cannot be held responsible for correct information incorrectly entered into the database.
Environmental certification system

- BREEAM
- BREEAM-SE
- LEED 2009
- LEED version 4
- Miljöbyggnad (Swedish certification system)

Annexes

Annex

2. SUSTAINABILITY WORK

Company's certification

- ISO 9001
- ISO 14001

Other:

Policies and guidelines

- The company has a code of conduct/policy/guidelines for dealing with social responsibility in the supplier chain, including produces for ensuring the requirements
- This is third-party audited

If yes, which if the following guidelines have you affiliated to or management system you have implemented

- UN guiding principles for companies and human rights
- ILO's eight core conventions
- OECD Guidelines for Multinational Enterprises
- UN Global Compact
- ISO 26000

Other policy guidelines

Management system
If you have a management system for corporate social responsibility, what out of the following is included in the work?

- [x] Mapping
- [x] Risk analysis
- [ ] Action plan
- [ ] Monitoring

Sustainability reporting guidelines:

GRI - Global Reporting Initiative

3. DECLARATION OF CONTENTS

Chemical content

Enter chemical content for the whole article. The concentration is calculated at component level according to the principle of "once an article always an article".

<table>
<thead>
<tr>
<th>Is there a safety data sheet for the article?</th>
<th>Is there classification of the article?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not applicable</td>
<td>Not applicable</td>
</tr>
</tbody>
</table>

Enter which version of the candidate list has been used (Year, month, day)

<table>
<thead>
<tr>
<th>The article is covered by the RoHS Directive:</th>
</tr>
</thead>
<tbody>
<tr>
<td>No</td>
</tr>
</tbody>
</table>

Enter how large a proportion of the material content has been declared [%]:

| 100                                          |

If the article contains nanomaterials deliberately added to obtain a particular function, enter these here:

The product does not contain deliberately added nanomaterial

<table>
<thead>
<tr>
<th>Is the article registered in Basta?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
</tr>
</tbody>
</table>

Other information:

### Article and/or sub-components

<table>
<thead>
<tr>

</table>

Comment
4. RAW MATERIALS

Raw materials

<table>
<thead>
<tr>
<th>Component</th>
<th>Material</th>
<th>Transport type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Country of raw material extraction</td>
<td>Steel</td>
<td>Ship</td>
</tr>
<tr>
<td>Country of manufacture/production</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Comment**

The steel raw material is produced at different smelting plants, mainly in the EU, according to the detailed specification of the current standard. The sheet dimensions are then adjusted at the production unit in Grevie.

**Total recycled material in the article**

- **Is recycled material included in the article?** Yes

<table>
<thead>
<tr>
<th>Material</th>
<th>Proportion after the consumer stage</th>
<th>Proportion before the consumer stage</th>
<th>Weight/percent by weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Steel</td>
<td>100</td>
<td>0</td>
<td>20%</td>
</tr>
</tbody>
</table>

**Comment**

About 20% recycled material are being used in the production of steel.
Renewable material

Enter proportion of renewable material in the article (short cycle, less than 10 years):

0

Enter proportion of renewable material in the article (long cycle, more than 10 years):

0

Included biobased raw material is tested according to ASTM test method D6866:

Is there supporting documentation for the raw materials for third-party certified system for control of origin, raw material extraction, manufacturing or recycling processes or similar (for example BES 6001:2008, EMS certificate, USGBC Program)? If yes, enter system(s):

No

Wood raw materials

Wood raw materials are included

Included wood raw material is certified

How large a proportion is certified [%]? 0

What certification system has been used (for example FSC, CSA, SFI with CoC, PEFC)?

Reference number:

Enter logging country for the wood raw material and that following criteria have been met. Country of logging:

- Does not contain type of wood or origin in CITES appendix of endangered species
- The timber has been logged legally and there is certification for this
5. ENVIRONMENTAL IMPACT

Environmental impact during life cycle of the article, production phase module A1-A3 under EN 15804

- Has environmental product declaration been drawn up according to EN 15804 or ISO 14025 for the article?

These product-specific rules, known as PCR, have been applied: Registration number / ID number for EPD:

- Climate impact (GWP100) [kg CO2-eq]:
- Ozone depletion (ODP) [kg CFC 11-eq]:
- Acidification (AP) [kg SO2-eq]:
- Ground-level ozone (POCP) [kg ethene-eq]:
- Eutrophication (EP) [kg (PO4)-3-eq]:
- Renewable energy [MJ]:

If there is environmental product declaration or other life cycle assessment, describe how the environmental impact of the article is taken into account from a life cycle perspective:

The information refer to "gate to gate", inflows (raw materials, inputs, energy, etc.) for the registered product into the manufacturing unit, and outflows (emissions and waste) from it and relates to unit of product 1 kg.

Country of final manufacture: Sweden
Energy used in the manufacture of the product: electricity 0,26 kWh per produced kilo. From 2017, all units in Sweden only uses electricity from renewable sources. See attached file.

Transport: <98% truck, deliveries to the customer/branch, <1% electric forklift, partially replaced shipments with diesel trucks, <1% diesel forklift, heavier internal transports.
Climate impact from internal transports: CO2 0,0025 kg, CH4 <0,0001 kg and N20 <0,0001 kg.

Emissions to air, water or soil from the manufacture of the product, climate impact from operations: carbon dioxide equivalents (CO2-e) ≈ 1,5 kg per kilo product (includes energy/waste/scrap/travels)
The production itself causes no emissions to air, water or land.

Residual products from the manufacture of the product: 5% steel scrap, 100% is recycled, waste code 17 04 05. <0,001 kg emulsions, 100% is recycled, waste code 20 01 26. Wipes, <0,00001 kg, 100% is energy recycled, waste code 15 02 02. All waste is taken care of by a carrier with the necessary permits. No waste is exported.

For information about raw materials, distribution, waste etc., see the other sections.

6. DISTRIBUTION

Distribution of finished article

Does the supplier use Returssystem Byggpall? Does the supplier apply any system with multiple-use packaging for the article?
- Yes Not applicable
- Not applicable

Does the supplier take back packaging for the article? Is the supplier affiliated to a system for product responsibility for packaging?
- Not applicable Yes

If yes, which packaging and which system?

Förpacknings & Tidningsinsamlingen

Other information:

If possible products are packed together. The packaging materials include wood, cardboard, and plastic wrap. Wooden pallets are being reused. All packaging consists of recyclable material, the cardboard Lindab uses for packaging consist of 97,5% recycled material. Shipments of manufactured goods are mainly transported by truck to the customer/branch. The average transporting distance is <500 km.
7. CONSTRUCTION PHASE

Construction phase

Does the article make special requirements in storage?

No

Specify

Does the article make special requirements for surrounding building products?

No

Specify

Other information:

8. USE PHASE

Use phase

Does the article make requirements for input materials for operation and maintenance?

No

Specify:

Does the article require supply of energy during operation?

No

Specify:

Estimated technical service life for the article:

>50 years

Comment:

Lifetime depends on the environment where the product is being used. Corrosive environments can affect the life of the product negatively. See Lindab’s product catalogue for more information.

Is there energy labelling under the Energy Labelling Directive (2010/30/EU) for the article? If yes, enter labelling (G to A, A+, A++, A+++):

Not applicable

Other information:
9. DEMOLITION

Demolition

Is the article prepared for disassembly (dismantling)?

Not applicable

Specify:

Does the article require special measures for protection of health and environment in demolition/disassembly?

No

Specify:

Other information:

The product only consists of steel and do not need to be disassembled for recycling. The steel is easily separated during demolition.

10. WASTE MANAGEMENT

Delivered article

Is the supplied article covered by the Ordinance (2014:1075) on producer responsibility for electrical and electronic products when it becomes waste?

No

Is reuse possible for the whole or parts of the article when it becomes waste?

Yes

Specify:

The use of standard dimensions makes it easier to reuse the products.

Is material recovery possible for the whole or parts of the article when it becomes waste?

Yes

Specify:

100% of the material can be recycled

Is energy recovery possible for the whole or parts of the article when it becomes waste?

Yes

Specify:

Heat recovery occurs at smelter.

Does the supplier have restrictions and recommendation for re-use, material or energy recovery or landfilling?

Yes

Specify:

Should be recycled.

Waste code for the delivered article when it becomes waste

170405 - 05 Järn och stål.
When the supplied article becomes waste, is it classified as hazardous waste?

No

Mounted article

Is the mounted article classified as hazardous waste?

No

Other information

11. INDOOR ENVIRONMENT

Indoor environment

- [ ] The article is not intended for indoor use
- [x] The article does not produce any emissions
- [ ] Emissions from the article not measured

Does the article have a critical moisture state?

No

If yes, state what:

- Noise
  - Can the article give rise to own noise?
    - No
  - Value:
    - Unit:
  - Measuring method:

- Electrical field
  - Can the article give rise to electrical fields?
    - No
  - Value:
    - Unit:
  - Measuring method:

- Magnetic fields
  - Can the article give rise to magnetic fields?
    - No
  - Value:
    - Unit:
  - Measuring method:

Paints and varnishes

- [ ] The article is resistant to fungi and algae in use in wet areas

Emissions

The article produces the following emissions in intended use:
