

# Sealing clamp

# SVK

## Description

Removable sealing clamp made from galvanised sheet steel.

The inside of the sealing clamp is covered with a thick layer of cellular EPDM rubber.

The sealing clamp can join two ducts together, fitting to duct or duct to fitting.

The sealing clamp is very useful when you want to be able to remove a fitting or a unit from a ventilation system, and can also be used to advantage for repairing a duct system.

Can be installed outside the outer jacket of an isolated duct.

The table below specifies the sealing clamp SVK, with diameter  $d$ , which is used on each nominal diameter  $d_1$ , of Isol.

Isol $\text{\O}d_1$ nom	Isol 25 Use SVK $\text{\O}d$	Isol 50 Use SVK $\text{\O}d$
100	150	200
125	180	224
160	200	260
200	250	300
250	300	355
315	355	400
400	450	500
500	560	600

## Dimensions
